L'ENGAGEMENT DU SALON AMBIENCE GROUP EN FAVEUR DE L'ENVIRONNEMENT

L'AVENIR DURABLE COMMENCE AVEC NOUS !

Chez Salon Ambience Group, chaque choix que nous faisons aujourd'hui est un pas en avant vers un avenir plus durable. Notre entreprise s'engage à limiter son impact environnemental et à promouvoir un style de croissance responsable, en intégrant la durabilité comme élément fondamental de notre identité. Nous savons que chaque petite action, chaque décision quotidienne, peut faire la différence ; c'est pourquoi nous souhaitons transformer notre engagement en actions concrètes, en inspirant également nos partenaires et nos clients à se joindre à ce voyage.

À quoi nous engageons-nous ?

› Utilisation de matériaux certifiés et durables

Salon Ambience Group est fier de garantir l'utilisation de matériaux certifiés et issus de sources durables, conformément aux normes écologiques les plus élevées. Nos produits à base de bois, par exemple, proviennent principalement de plantations en Suède, qui non seulement respectent les cycles de régénération naturelle mais les optimisent en plantant plus d'arbres qu'ils n'en coupent. 'Pour nous, le bois n'est pas seulement une ressource à exploiter, mais une responsabilité à long terme.' Cet engagement non seulement préserve les écosystèmes locaux, mais assure également que notre production soit en harmonie avec la nature.

› Efficacité énergétique avancée

Nous comprenons qu'une gestion responsable de l'énergie est cruciale pour réduire notre empreinte écologique. Nous utilisons des systèmes d'éclairage LED à faible consommation équipés de capteurs de mouvement afin que la lumière ne soit présente que dans les zones effectivement utilisées, minimisant ainsi la consommation énergétique. De plus, tous les éclairages, le chauffage et les appareils en veille sont éteints lorsqu'ils ne sont pas nécessaires.

« Economiser l'énergie, c'est investir dans l'avenir. » Cette attention nous permet de réduire le gaspillage et d'adopter une approche responsable de l'utilisation des ressources, sans compromettre notre efficacité opérationnelle.

› Recyclage et récupération des matériaux

La gestion des déchets est un aspect crucial de notre philosophie environnementale. Nous recyclons le papier, le plastique, le carton et les toners, en veillant à ce que chaque ressource trouve une nouvelle vie plutôt que d'être ajoutée aux déchets. Les résidus de bois générés pendant la production ne sont pas jetés, mais utilisés pour alimenter des systèmes de chauffage écologiques dans les zones de l'usine. Cette approche transforme chaque déchet en ressource, garantissant que rien ne soit gaspillé et réduisant l'utilisation de combustibles fossiles.

› Durabilité dans les transports et mobilité consciente

Nos véhicules d'entreprise sont maintenus en parfait état de fonctionnement, conformément aux recommandations des constructeurs, afin de limiter les émissions et d'optimiser la consommation de carburant. Nos conducteurs sont sensibilisés à l'importance de respecter les limitations de vitesse, de contrôler régulièrement la pression des pneus et d'adopter une conduite économique. « Chaque kilomètre parcouru de manière responsable est un pas vers un environnement plus sain. » Cet engagement non seulement réduit notre impact environnemental, mais contribue à une mobilité plus sûre et responsable.

› Réduction des emballages et réutilisation des matériaux

En collaboration avec nos fournisseurs, nous travaillons constamment à minimiser les emballages, en éliminant tout matériau superflu qui pourrait contribuer à la pollution. De plus, nos meubles échantillons sont réutilisés autant que possible, garantissant ainsi une utilisation optimale des matériaux. « Réduire et réutiliser n'est pas seulement une stratégie : c'est notre façon de respecter la planète.
